Gary,

Additional comments below on the work plan from PCS Lab Manager Chris Barry.

Thanks, Bob Allen

Page 25 - 27

Detection Limits and Limits of Quantitation

They list

- Method Detection Limits (MDL)
- Sample Detection Limits (SDL)
- Method Quantitation Limits (MQL)

They define MDLs and SDLs, but they define Method Reporting Limits (MRL), instead of MQLs. They also list MQLs on Table 3-1. It appears that they use these two terms interchangeably. They can be, but are not always the same definition. They need a definition of MQL.

Also, I am not sure that the MDLs and MQLs listed in Table 3-1 are the appropriate Data Quality Objectives that the EPA will accept. The EPA should have some input.

Chris could you write me up short blurb on what you found on pgs 25-27 re: MRL and MQLs so I can get it to the EPA by Monday?

Folks,

Here is the revised River Fleet plan; I'd like to respond to this by next Monday, 6/25/12, so I would appreciate any comments by then. Also, I'm attaching the comments on the draft.

Thanks,

Gary Miller, P.E. (inactive)

Subject: Final Work Plan - SJRF Site

Gary;

Attached is an electronic copy of the final work plan for conducting the preconstruction baseline site assessment at the San Jacinto River Fleet property.

As requested, no hard copy will be sent.

Since we are in hurricane season, SJRF is anxious to move forward with getting the Agreed Order in place, so if that could be expedited, it would be greatly appreciated.

If you have any questions, please feel free to contact me.

Thanks

Mark B.
